

Product Data Sheet

SODIUM GRANULES

Dr. Bilger Umweltconsulting GmbH

Sodium Granules

It can be useful to apply sodium in the form of granules for carrying out some different organic or inorganic synthesis. Therefore Dr. Bilger Umweltconsulting offers sodium also in this dosage form. The sodium pieces are stored and delivered under an inert liquid, standardly petroleum.

Characteristics of Sodium Granules

- The surface is formed irregularly
- Diameter of 2 – 8 mm
- Stored under petroleum
- Units of 100 or 500 g in glass bottles à 250 respectively 1000 ml

By request the sodium granules can be delivered also in paraffinic oil or in each other appropriate protection liquid.
